## INTERNATIONAL CONFERENCE ON DEVELOPING THINKING AND LEARNING WITH ICT: CHANGING EDUCATION FOR FUTURE NEEDS

29<sup>th</sup> and 30<sup>th</sup> May 2016

*Organized by*

Department of Education  
Osmania University  
Hyderabad 500007

## About the Organizer

### *Osmania University*

The Osmania University, established in 1918, is the seventh oldest in the country, third oldest in South India and the first to be established in the princely state of Hyderabad.

### *Department of Education*

The Osmania University Training College came into existence and started functioning with effect from 31/08/1928. At that time B.T. Degree was awarded after successful completion of the programme. In 1947, the college was shifted to the University campus and was renamed as University College of Education. Under the centrally sponsored scheme, to strengthen and reorganize teacher education, a number of teacher education institutions were upgraded to CTE, and a few into IASE centers of excellence, research and innovations. Accordingly the University college of Education, Osmania University was upgraded to the status of IASE during the year 1996-97. According to the norms of MHRD, Govt. of India, this Department is renamed as Institute of Advanced Study in Education (IASE). Faculty of Education, Department of Education, Centre for In-service Teacher Education are placed in the IASE campus.

## About the Conference

**ICT in education is the key to unlocking the skills and knowledge of our future generations of young people. It is the tool for learning for the 21<sup>st</sup> century.**

Kate McKenzie

Information and Communication Technologies (ICTs) are information handling tools that are used to produce, store and process, distribute and exchange information. These different tools are now able to work together and combined to form networked world which reaches and brings education into every corner of the globe. The idea is that teaching and learning can

successfully take place through the application of electronic communication facilities between teachers and students. It is important to realize the 21<sup>st</sup> century classrooms demands and students aspirations. We need to bring learning to people instead of people to learning. In order to make it possible, teachers should empower digitally by developing their thinking on emerging trends in education. This will meet the future needs of our Education System.
