Vol. 15 / Issue 1

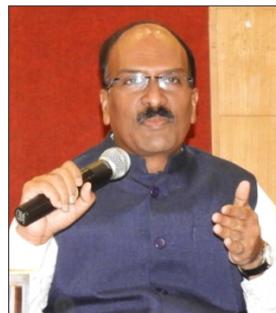

January, 2020

VICE-CHANCELLOR'S MESSAGE

Wish you all a Happy Republic Day!

I am happy to convey my best wishes to all the Teaching and Non-teaching staff of the University on the occasion of Republic Day.

I appreciate the continuous efforts of teaching community on their academic contributions, support of non-teaching staff, administrative officers, scholars and students.

On this occasion I recall that the University has made several achievements over these 44 years and I look forward to see the University to usher into a new phase of development to meet the changing needs of the society and the nation.

Today the youth is looking forward for new skills and more job oriented courses. The University should initiate immediate measures to frame new courses which can meet the needs of the Industry and also generate employment opportunities to the University students. In this direction, the University should conduct orientation programs, skill development programs, soft skills and personality development programs to enable the students to face competitive environment with high levels of confidence.

E-Governance should be practiced in the University at all levels, to facilitate access and speedy decision making in the University administration. The University should formulate strategies for improving the quality in terms of academic standards and quality education by enhancing the academic curriculum considering the latest developments in the industry and the local requirements. The use of ICT in the teaching and learning process should become a reality. Today we are witnessing rapid advances in the field of information and communication technology and their application in educational sector. Any delay would make the University lag behind others.

I advise all the Departments of the University to undertake social activities by adopting one village by each department to eradicate social evils, to educate them on the issues relating to health and hygiene, to undertake community development programs with the participation of all the villagers and encourage children and other dropouts to join the mainstream of education. I also reiterate that University should utilize the services of retired faculty for teaching, research and extension activities.

I congratulate the editorial team of this news letter for presenting the activities and achievements of the University in an excellent manner.

With best wishes,

Dr. B. Janardhan Reddy, IAS

I/c Vice-Chancellor
