1. The Department of Statistics was started in the academic year 1996-97 to encourage the upcoming subjects in view of future development and job opportunities to the students. It was started at University Arts and Science College, by introducing PG course in Statistics M.Sc.(Statistics) in regular mode with an intake of 21 students. The UG course in Statistics exists in University Arts and Science College is under control of this Department.

The work-load of the present system for PG-72 periods per week and UG-24 periods per week. Thus the total work-load of the Department at present is $72+24=96$ periods per week.

But due to lack of faculty, the Department is unable to provide optional papers in 3rd and 4th semesters of M.Sc.(Statistics). With introduction optional papers in 3rd and 4th semesters the work-load would become $72+9=81$ periods per week in PG. Thus the total work-load of Department would be (PG): $81+$ (UG) $24=105$ hrs per week as per UGC norms of defined work-load per teacher.

In spite of lack of teaching staff in the Department, the Department of Statistics could achieve some laurels since its inception in 1996 are follows:

1. The department successfully produced eight Ph.D's. Four more students are going to submit their Ph.D's shortly.
2. The faculty and research scholars have published more than 40 Research Papers in Various reputed National/International journals.
3. One senior faculty successfully completed a Major Research Project worth Rs. 6.32 Lakhs during 2011-14 funded by UGC, New Delhi.
4. More than 90% of alumni of this Department are absorbed in various National/International Corporate/Government institutions at various levels in India and abroad. Also two students of this Department have qualified in UGC-NET and 10 students qualified TS SET examination.
5. This Department has conducted 5 two-day Seminars/Work-shops successfully for the faculty of UG course in various degree colleges under KU.

The Department is being run by two regular teachers, 3 contractual teachers and 2 part-time teachers since 1996-97.

The Department is shifted to Kakatiya University campus in the academic year 2012-13, with same faculty. Last year one regular teacher has retired. At present the Department is running with only one permanent teacher, 2 contractual teachers and 2 part-time teachers. It is very difficult to run the department with these staff.

Therefore, there is a dire need of some more regular teachers for this Department.

Hence the Department requires:

Professor - 1 (1X14=14 periods per week)

Associate Professor - 2 (2X14 =28 periods per week)

Assistant Professor - 4 (4X16=64 periods per week)

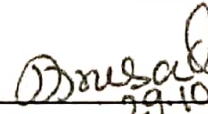

Without regular faculty, this Department is unable to get funds from UGC on par with all other departments.

In view of the above facts, it is resolved to recommend to request the university to create the following regular faculty positions, for Department of Statistics, KU.

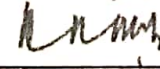

- (1) Professor - 1
 - (2) Associate Professor - 2
 - (3) Assistant Professor - 4
