Dr. Srinivas Podeti,
Assistant Professor,
Microbial Biotechnology Laboratory,
Department of Biotechnology,
Kakatiya University,
WGL,
TS, India

As part of collaborative agreement with Dr. Podeti Srinivas at Department of Biotechnology, Kakatiya University, Warangal, India to co-supervise **Mr. Govindu Dayakar** worked at my laboratory under the Stipendium Hungaricum Programme for 11 months on the project **"Role of Phosphorus, Potassium-solubilizing PGPR in plant nutrition"**.

He used different molecular methods for identification of Plant growth promoting soil microbes and worked on identification of PGP traits of P,K solubilizing bacteria. He also involved in inoculation experiments of cellulose producing bacteria and find AM fungal association by using Grid-line intersect method.

Sincerely

Budapest 17th June 2019.

Prof. Borbala BIRO, DSc,
Doctor of Hungarian Academy of Sciences
